Research Information Management

Overview

Part of **DIGITAL**science

Managing research information can be challenging...

A Research Information Management solution from Digital Science

Elements

A central source of
information for your
organization's
research

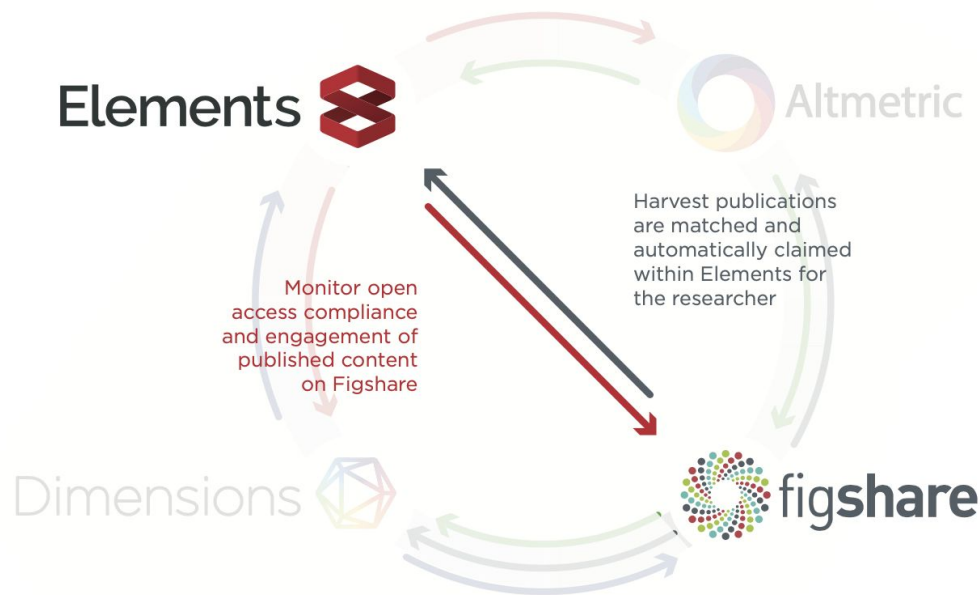

figshare

An open platform for
managing and
publishing any type of
research output

A Research Information Management solution from Digital Science

By integrating Elements and Figshare for Institutions you can obtain specialized open access monitoring and reporting tools, record and showcase research, and have a definitive source of truth of your organization's outputs, activities, and information.

How can Symplectic Elements and Figshare help?

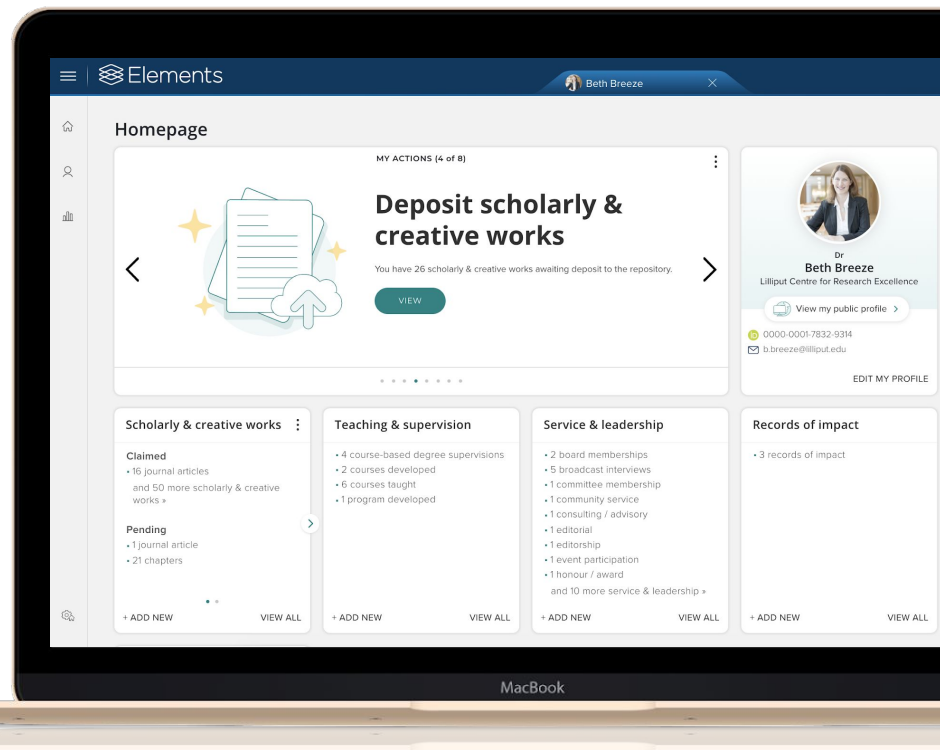

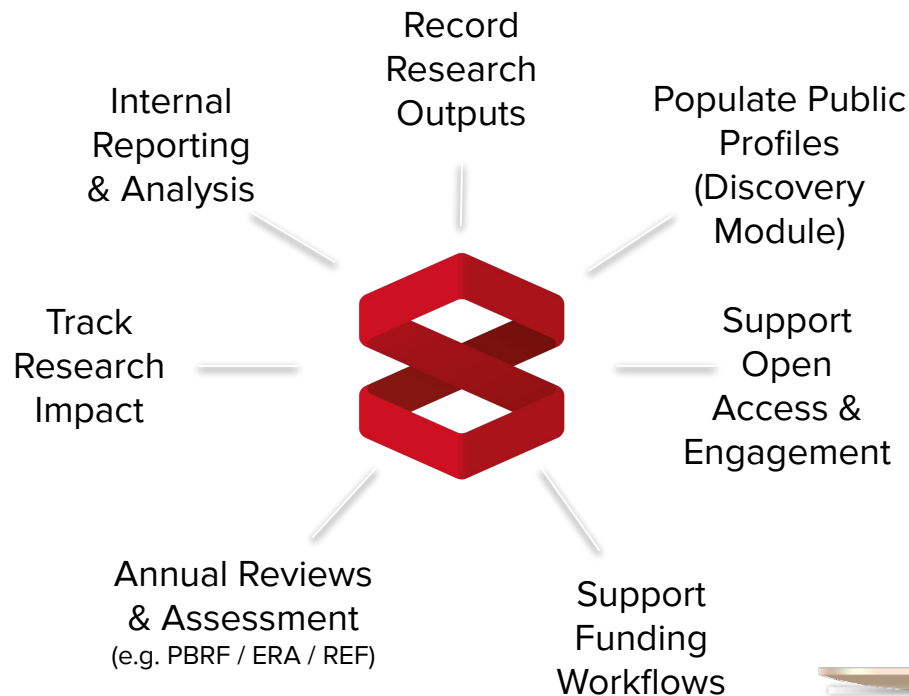

Finding solutions to some challenges...

- Administrative burden - capture, manage, and reuse research information and data
- Siloed data - identify, match, and link to research from various sources
- Time and resource restrictions - ready-to-use and configurable templates
- Recording diverse outputs - create an established home for all types of research outputs
- Compliance - set institutional policies and advice

Let's look at: Symplectic Elements

Elements: solutions for research management

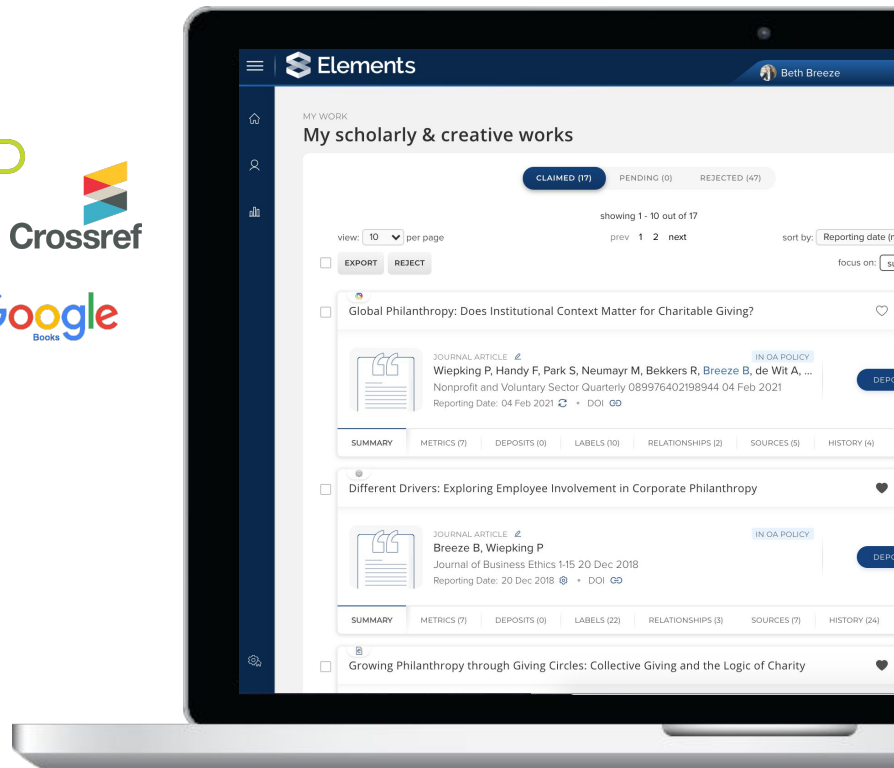

Automatic harvest of data to minimize data entry

External data sources

Institutional Sources of Data

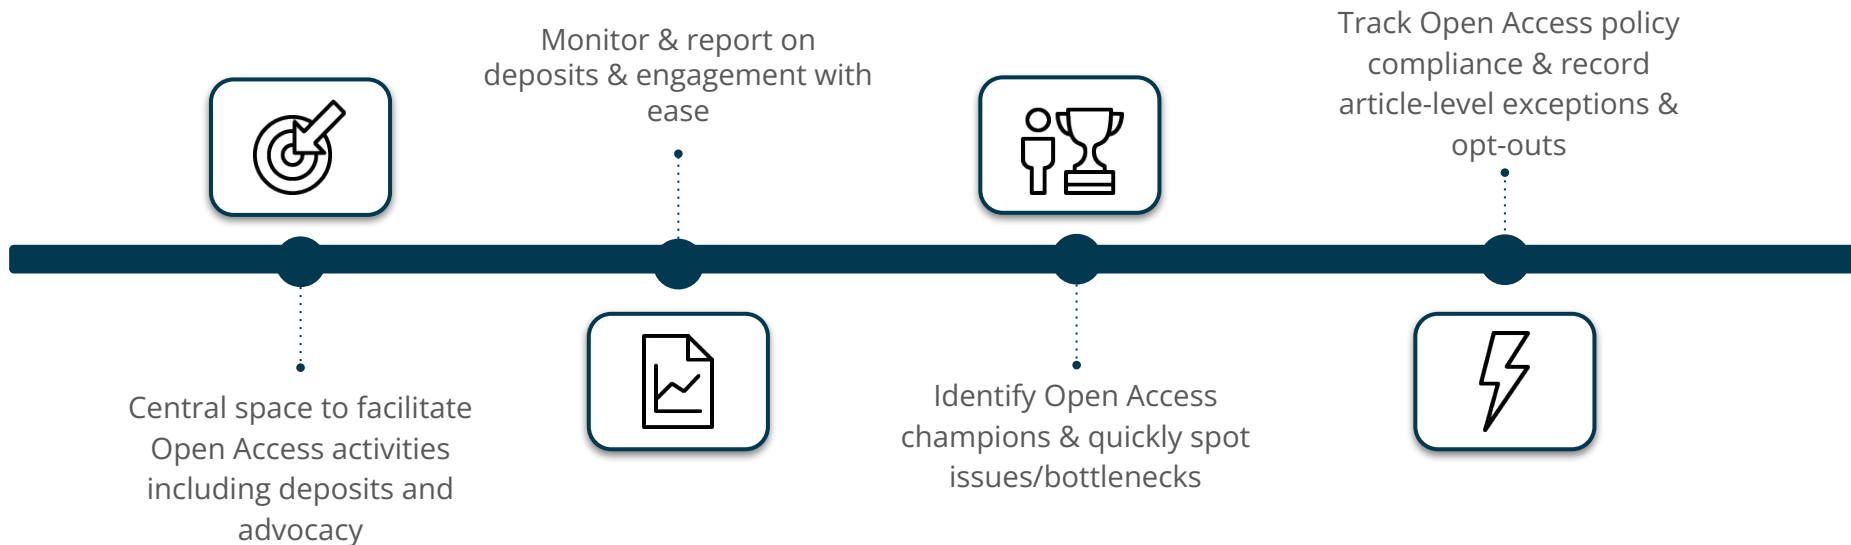

Symplectic Elements

Open Access Monitor & Discovery Module

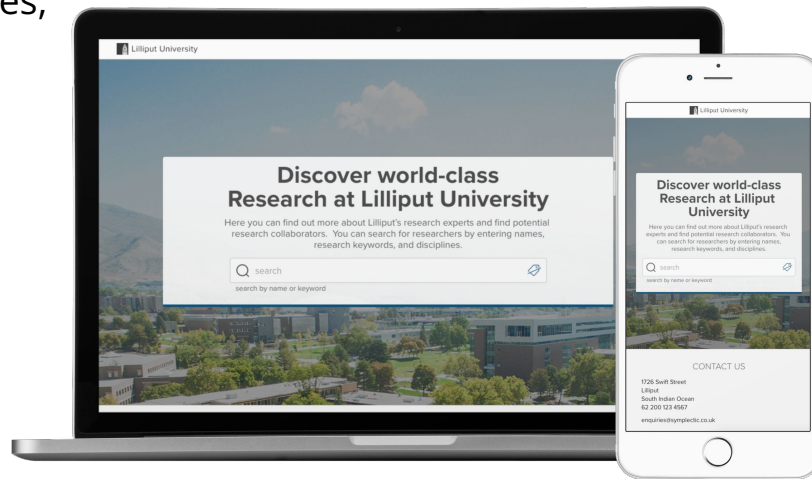

Elements: Open Access Monitor

Elements: Discovery Module

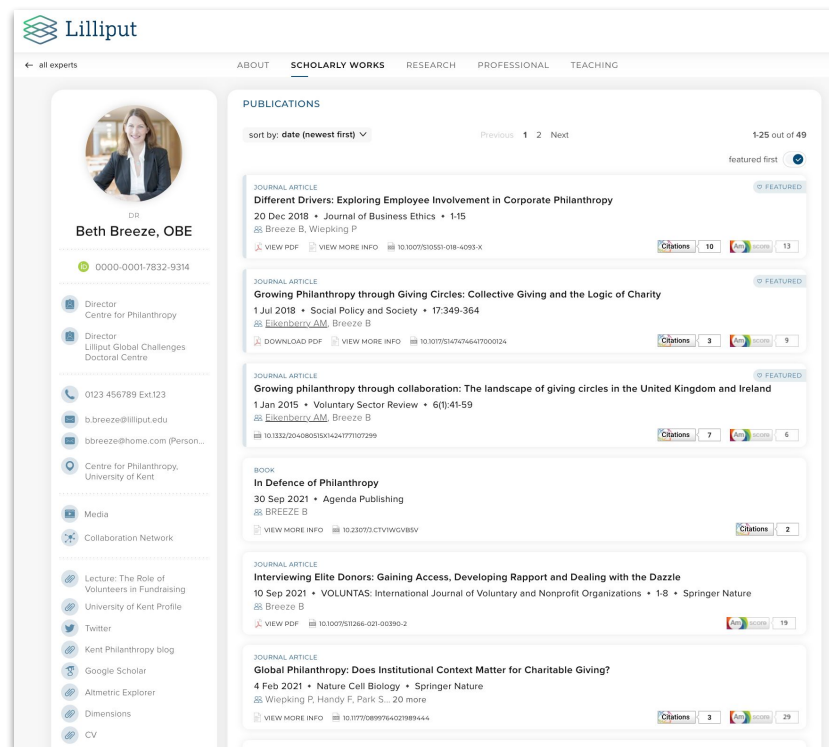

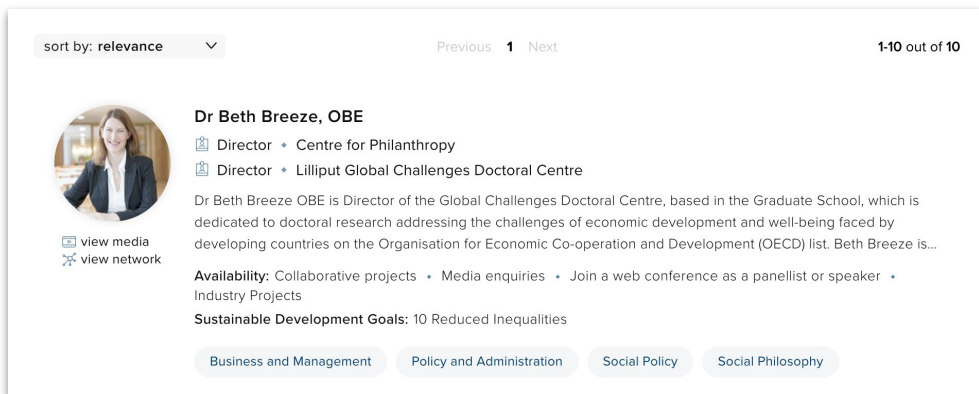

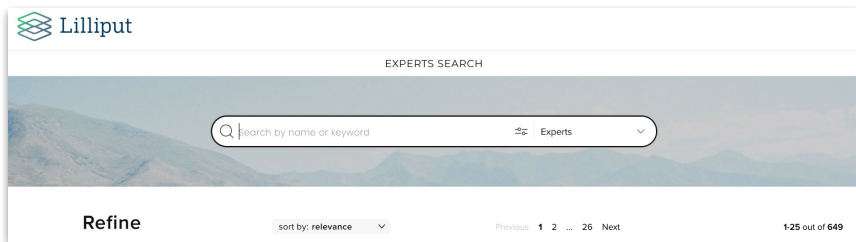

The Elements Discovery module is a search and discovery layer for your existing Elements user profiles, such as:

- Promote what you do best
- Make your expertise accessible and engaging
- Build a fuller picture
- Enable collaboration and innovation
- Drive R&D and explore new revenue streams

<https://www.symplectic.co.uk/public-profiles/>

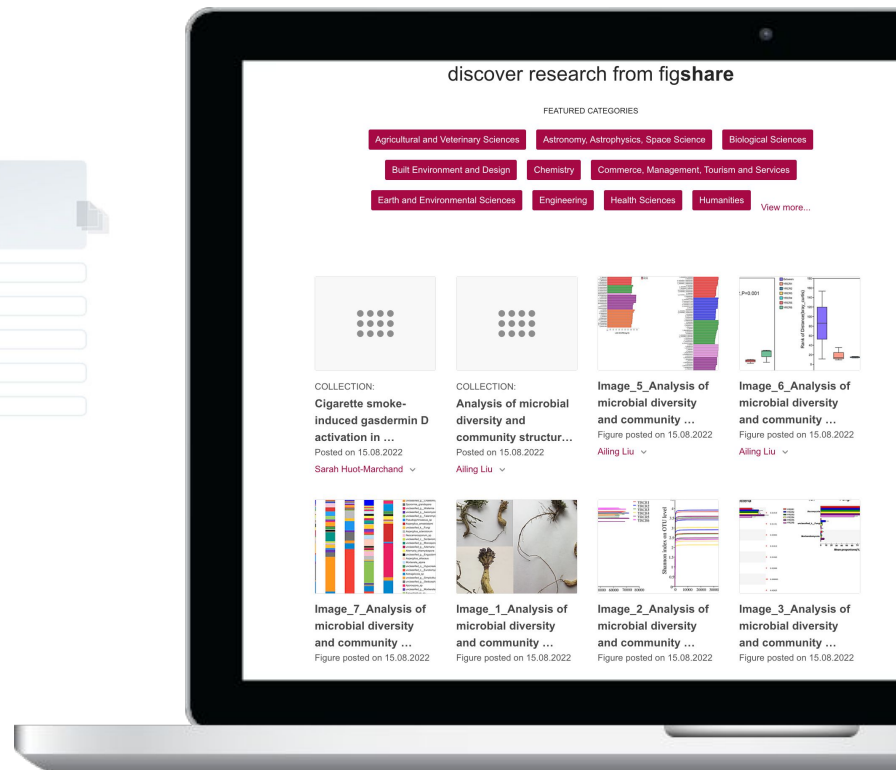

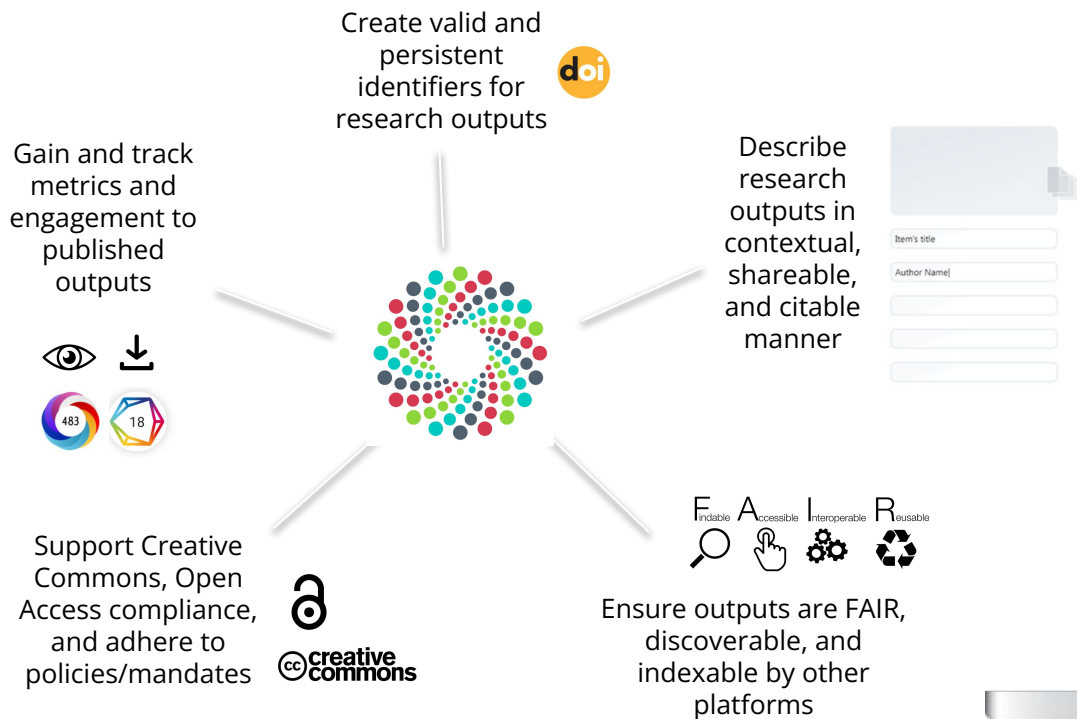

Elements: Discover Expertise

Let's look at: Figshare for Institutions

Figshare: a repository for all research outputs

Figshare: benefits of showcasing your outputs

Publishing on Figshare supports Open Access and:

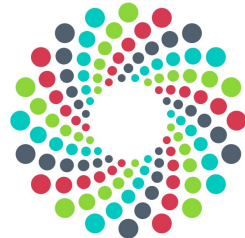

- Gives your research an established home
- Allows greater awareness, discoverability and citability, plus reuse
- Helps you find collaborators in your research expertise
- Ensures you gain credit
- Links to other published works

Figshare

A place for all research outputs

Figshare: support research across all disciplines

- Articles & pre-prints
- Books, book chapters & monographs
- Datasets & figures
- Theses & dissertations
- Media files (audio & visual)
- Software & code
- Performances & events
- Compositions
- Digital collections & archived materials
- Transcriptions
- Clinical trial records
- Presentations & posters
- Educational materials & online resources
- Reports & grey lit
- Physical objects
- Data management plans

The State of Open Data 2021

[Cite](#) [Download \(19.4 MB\)](#) [Share](#) [Embed](#) [+ Collect](#) [...](#)

Report posted on 01/12/2021, 00:48 authored by Digital Science, Natalia Simoes, Greg Gooley, Megan Hardman, Connie Clark, Sara Gorokas, Damon Strange, Graham Smith, Daniel Rippe, Kazuo Ito, Naoko Miyai, Yessica Tshomba, Munkalem Remeigie, Peter Baines, Garry Bellair

We're proud to release our sixth State of Open Data report.

This year's report includes contributions from around the world on data quality and curation, engaging researchers in open data practices, how open data can help validate research and combat scientific misinformation, and more.

The survey data behind the report can be found at <https://doi.org/10.608409/digital-science.17081231>.

Abstract

Background: The issue of drug checking at events such as music festivals has come to the fore in recent years both in New Zealand and other countries such as Australia and the UK. Drug checking, also referred to as pill testing, involves testing a small sample of a particular substance to determine what it contains. Alongside the actual testing drug checking services usually offer advice around how to take the substance more safely e.g. mix the substances together, and to avoid mixing alcohol and yourStuff (KYSNZ) are a voluntary organisation that have been providing services at New Zealand festivals for approximately five years. In a legal area, making it difficult to provide a harm reduction service, festival organisers could be prosecuted under s12 of the (A) for openly having drug checking at their events.

Symplectic Elements & Figshare

A feature-rich integration

Elements

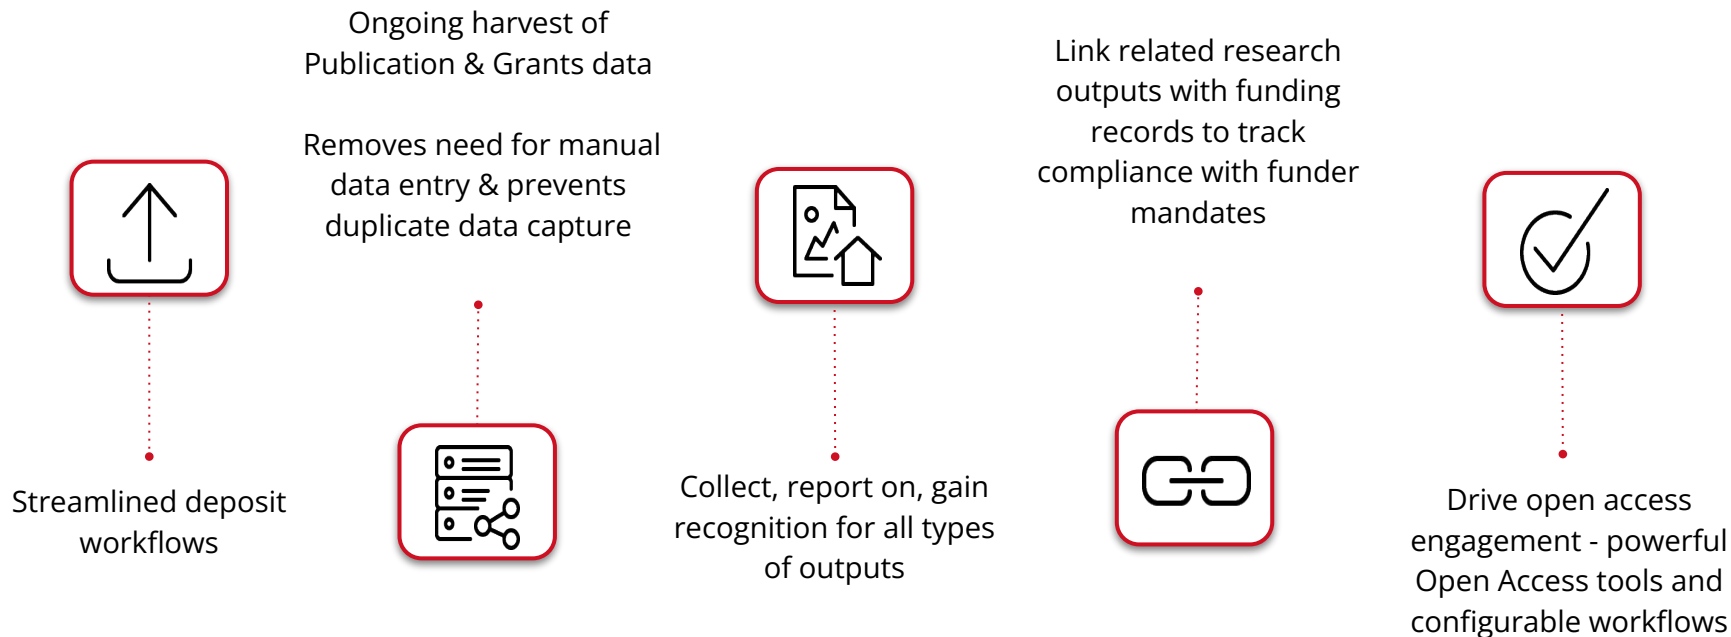

+

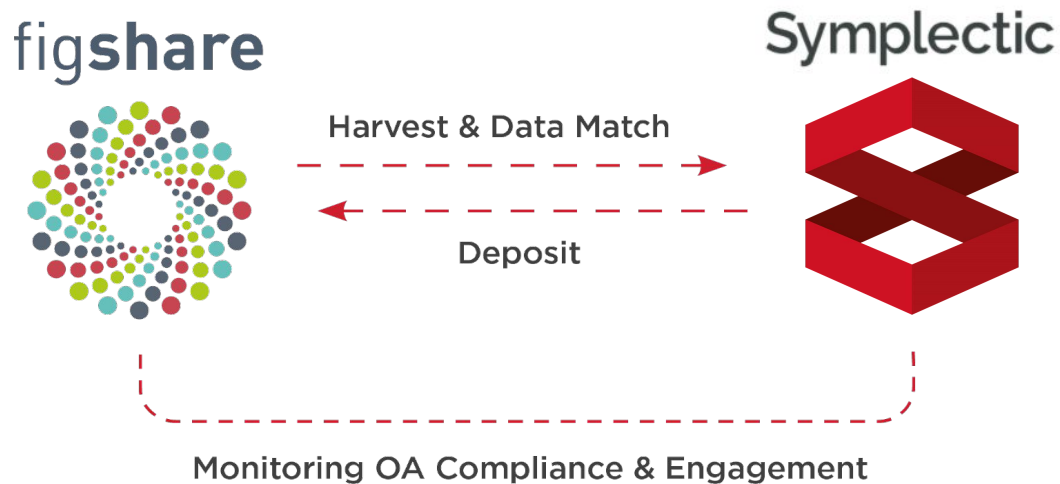

figshare

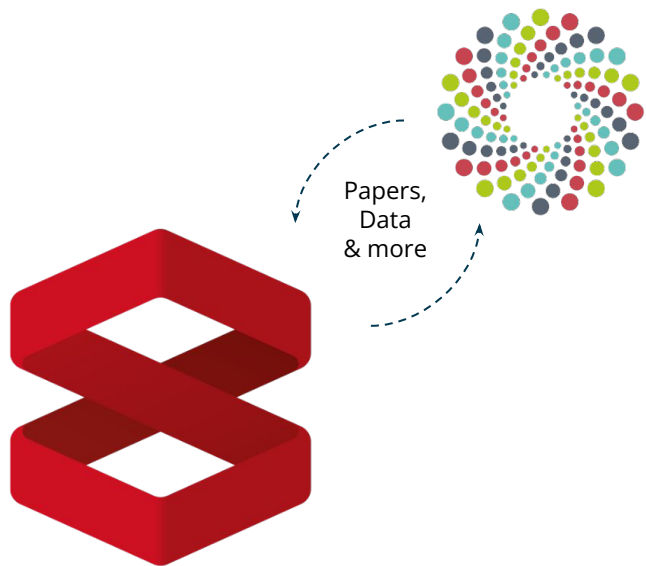

Streamline configurable research information management workflows

Bi-directional integration

Figshare as full institutional repository

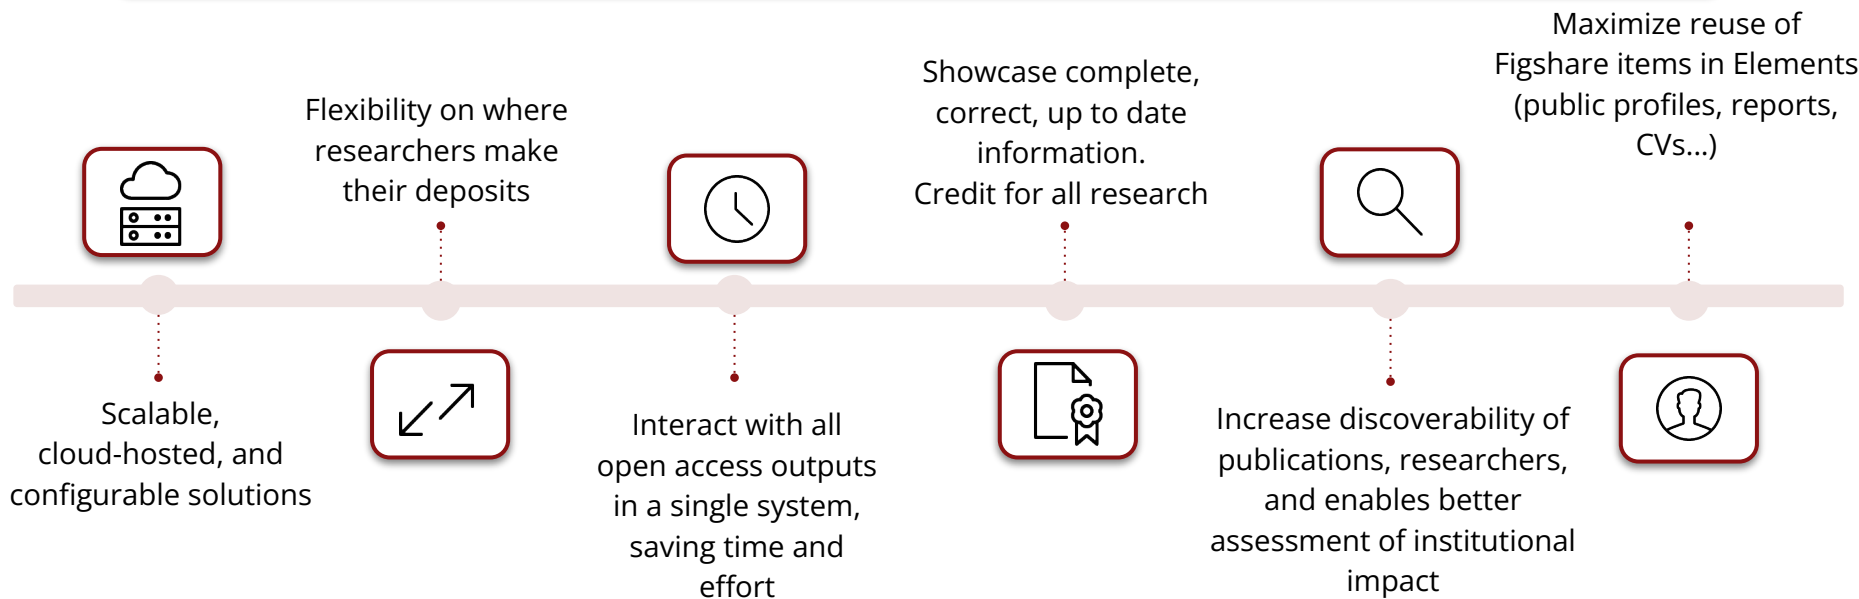

Figshare as a data repository alongside a publications repository

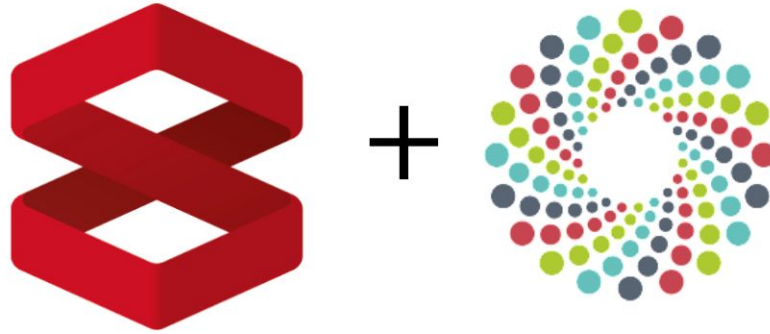

Integration with an effective workflow

The combined power of Figshare and Elements creates a streamlined open access solution that helps to build a comprehensive picture of your research.

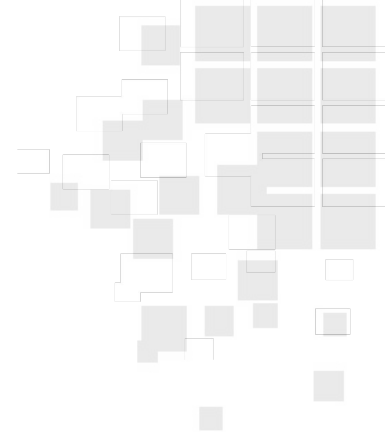

Effective Research Information Management = Elements + Figshare

Take your research information management to the next level
